

Module #4

## **STANDARD AMBULANCE FEATURES: OPERATION, LOGIC & DIAGNOSTICS**

Everyday functions: mastering standard ambulance features

- Audience: Intermediate-level techs responsible for diagnostics or system management
- Level: Intermediate
- Prerequisite: Module #2 and Module #3 recommended
- Duration: 2 hours
- Location: At your facility, at the OEM plant, or online (webinar)

### **Curriculum**

- Lighting features (incl. Day/Night mode, Smooth Pattern)
- 12V power circuits
- Oxygen system indicators and logic
- Door logic  
(lock, ajar detection, safety release)
- Mirrors
- Suction system

### **Key Takeaways**

Participants gain a solid understanding of how standard ambulance features operate, how their logic is structured, and how to diagnose unexpected behaviour with accuracy.

This foundational knowledge improves technician confidence when handling the features used most often by paramedics, driving faster and more consistent diagnostic decisions.

Official certification  
at the end of the session.
