

Module #6

CUSTOM AMBULANCE FEATURES: OPERATION, LOGIC & DIAGNOSTICS

Beyond the standard build: how custom features integrates and operates

- Audience: Intermediate-level techs responsible for diagnostics or system management
- Level: Advanced
- Prerequisite: Module 1 (or basic electrical knowledge). Module 3 recommended.
- Duration: 1 hour
- Location: At your facility, at the OEM plant, or online (webinar)

Curriculum

- LiquidSpring suspensions
- Optional suspension systems
- Camera system
- FX Action™ seats
- Sanuvox (UV air purifier)
- Aerodynamic cab-riser
- ESPAR

Key Takeaways

Participants will gain a solid understanding of how customer-specific and optional features operate and how their underlying logic influences system behaviour.

By learning the functional principles behind custom components, technicians can approach diagnostics with clarity and adapt to the unique configurations found across different fleets.

Official certification
at the end of the session.
